

Safety Information- filter glass-based, optical reference material

1. Manufacturer and product information

Reference material type: F1, F390, F2, F201, F3, F204, F4, F202, F203, F301, F303, F7, F7W, F7A

Manufacturer: Hellma GmbH & Co. KG
Klosterrunsstr. 5
79379 Müllheim
GERMANY

Telephone: +49 7631 182 0

Safety information compiled on

17th September 2019

by Vanessa Hochhuth

2. Possible dangers

As this filter glass-based, optical reference material involves a product and not a dangerous substance, the following information should be regarded as a voluntary customer service. In normal circumstances no special measures need to be taken when using the optical reference material

3. Handling and storage

The optical reference materials are made of filter glass and accordingly should be carefully handled to avoid breakage of the glass. Filter glass-based, optical reference material should be carefully held on the frame. Soiling of the optical surfaces leads to altered values which lead to a recertification of the optical reference materials. The same applies to scratches in the optical surfaces.

When the optical reference materials are not in use they should be stored in a dry, dust-free place away from light in their original case at non-condensing humidity and temperatures of 4 – 40°C.

4. Stability and reactivity

Stable under the conditions mentioned above.

5. Disposal instructions

These optical reference materials can be disposed of in household waste. If you are unable to dispose of the optical reference material according to the official regulations, you can return them to Hellma who will correctly dispose of them for you, free of charge.

6. Transport regulations

None

7. Other information

None
